**This is Rektorat, a type family based on historical letterings originally created in 1933. It was then used for the signage of the modernist building in which the 'Kunstgewerbeschule' (today named as ZHdK) and the 'Museum für Gestaltung' moved into, the latter is domiciliated there since 85 years. During a renovation of said building in 2001, the original letterings were discovered hidden behind some wallpaper. With students, Rudolf Barmettler traced parts of the characters, refining and fully redrawing them in ink. The intention was to create a typeface which could be applied for use as descriptive terms within the building itself, for example 'WC Damen', 'Kein Durchgang', 'Rauchen untersagt'. In 2002, while teaching at the F+F Design School, Barmettler, together with his students, created additional weights. Reinhard Haus then helped to digitise the drawings and extend the fonts using 'Fontographer'. The objective was to create a family. Unfortunately however, this was never realised. Since 2014 Rudolf Barmettler and Anton Studer have reworked the entire concept and every detail of the typeface to make it more than just another historical remake. The current family consists of 14 cuts which are the first part of an ever-growing superfamily.**

12/15 +20

To suppose that the eye with all its inimitable contrivances for adjusting the focus to different distances, for admitting different amounts of light, and for the correction of spherical and chromatic aberration, could have been formed by natural selection, seems, I freely confess, absurd in the highest degree. When it was first said that the

sun stood still and the world turned round, the common sense of mankind declared the doctrine false; but the old saying of *Vox populi, vox Dei*, as every philosopher knows, cannot be trusted in science. Reason tells me, that if numerous gradations from a simple and imperfect eye to one complex and perfect can be shown to

To suppose that the eye with all its inimitable contrivances for adjusting the focus to different distances, for admitting different amounts of light, and for the correction of spherical and chromatic aberration, could have been formed by natural selection, seems, I freely confess, absurd in the highest degree. When it was first said that the sun stood still and the world turned round, the common

sense of mankind declared the doctrine false; but the old saying of *Vox populi, vox Dei*, as every philosopher knows, cannot be trusted in science. Reason tells me, that if numerous gradations from a simple and imperfect eye to one complex and perfect can be shown to exist, each grade being useful to its possessor, as is certainly the case; if further, the eye ever varies and the variations

be inherited, as is likewise certainly the case; and if such variations should be useful to any animal under changing conditions of life, then the difficulty of believing that a perfect and complex eye could be formed by natural selection, though insuperable by our imagination, should not be considered as subversive of the theory. How a nerve comes to be sensitive to light, hardly concerns us

## Ordering

Online ordering is the fastest and most convenient way to order and receive your fonts. After payment you will instantly receive your fonts via mail.

All fonts are exclusively available through our website: [www.nouvellenoire.ch](http://www.nouvellenoire.ch)

## Desktop Licence

To install the typeface onto a desktop machine or server that distributes to a number of desktop machines, a desktop licence must be purchased.

## Web Self-hosting Licence

To embed the typeface onto a website, a Web Self-hosting License must be purchased.

## Testing fonts (Trust License)

We believe that font testing should be as simple as possible. Therefore we offer all our fonts as trial versions for free. Just go through the purchase process as if you would buy the font and select the 'Trust License' button before checkout. If you like the typeface, drop us a friendly line and we will get back to you with the full version asap. **Once you will use it for a project you will need to buy the license according to your use.**

## Basic vs Standard

Please check Glyph Sheet + Language Support page to get detailed informations about the characterset.

## Terms and Conditions

All information in this PDF is checked carefully never the less, we can not guarantee and do not take any responsibility that there are no wrong informations or failures.

This Specimen PDF was created in February 2018. Please check our website for perhaps updated version.
